

Updated Patient Mapping Requirements

Applicants or Current Participants who are testing or will be entering testing in the Developers Integration Lab (DIL) under the Participant and/or Product Testing Programs led by Healthway on behalf of the eHealth Exchange will be required to perform the following additional steps highlighted in the sections below:

1. Once logged into DIL environment navigate to the Dashboard screen. Under My Information on the left side of the screen select "Participant Info". See below:

The screenshot shows the 'DIL Lab Platform' dashboard for 'AEGIS DILPA003 Participant - Dashboard'. The left navigation menu includes sections for 'Dashboard', 'My Information', 'Programs', 'Infra Structure', and 'Help'. The 'My Information' section is circled in red, and a blue arrow points to the 'Participant Info' link within it. The main content area displays connection information and a table of current service set selections.

Select	Name	Progress	Results	Initiated	Status
<input type="checkbox"/>	SS_PRL_0011.0-2011	<div style="width: 100%; height: 10px; background-color: green;"></div>	2 Passed; 82 Pending	Jun 16, 2014 12:49:01 PM	In Progress

2. If you are an **APPLICANT OR PARTICIPANT** that is testing or about to begin testing in the DIL, you will need to do the following:
 - a. After selecting Participant Info you will be taken to the below screen. You will need to scroll down to the bottom of this screen and map patient IDs as required from your System Under Test (SUT).
 - b. Applicants or Participants in the Participant Testing Program should map for the 12 required test patients as shown in the updated (eHealth Exchange Participant Testing Data Load Set-DS_PRL-2.xls – tab #2) and you can then use the **dummy numbers** provided in the that tab (DP0001 – DP0022) to complete the mapping to allow you to run all tests in the service set. **These tests will not be reviewed or reported on for the Participant Testing Program.**
 - c. Note: If you do not map the additional patients, you will get an error when you try to run tests, indicating patient must be mapped.
