

## Data Usability Workgroup

December 1, 2022

# Agenda

- Welcome, Introductions, Membership, Agenda and Workgroup Logistics - Adam Davis, MD – 5 minutes
- Workgroup Roadmap, Phase 3 and Phase 4 Plans – Bill Gregg, MD – 5 minutes
- Data Usability Public Comment Discussion and Edits – Didi Davis, Co-chairs and Workgroup - 50 minutes

Adam Davis, MD, Co-chair  
Sutter Health

Bill Gregg, MD, Co-chair  
HCA Healthcare

Didi Davis, VP  
The Sequoia Project

# Workgroup Members

266 Organizations

369 Participants

Healthcare Providers

Public Health

Consumer/Patient

Standards Developer

Health Plan/Payer

Federal, State, Local Government

HIN/HIEs

Other

Health IT Developers

## Meeting Materials and Recordings

### Phase 2

September 9: Meeting Notes	+
August 26: Meeting Notes	+
August 12: Meeting Notes	+
July 8: Meeting Notes	+
June 10: Meeting Notes	+
May 13: Meeting Notes	+
Apr 8: Meeting Notes	+
Apr 1: Meeting Notes	+
Apr 15: Meeting Notes	+

### Phase 1

Mar 25: Meeting Notes	+
-----------------------	---

## Four Work Phases

The Interoperability Matters **Leadership Council** chartered the Data Usability Workgroup to work in the following phases:

<b>PHASE 1</b> <b>Administration and Prioritization</b> October 2020-March 2021 <a href="#">View Meeting Notes</a>	<b>PHASE 2</b> <b>Developing Initial Drafts (current)</b> April 2021-Q1 2022 <a href="#">View Meeting Notes</a>	<b>PHASE 3</b> <b>Public Comment Period/ Recommended Next Steps</b> TBD, based on end of Phase 2-60 days after start	<b>PHASE 4</b> <b>Finalizing Implementation Guides</b> [TBD, based on end of Phase 3]-13 months after start

## Phase 1: Administration and Prioritization

## Phase 2: Developing Initial Draft

## Phase 3: Public Comment Period/ Recommended Next Steps

## Phase 4: Finalizing Implementation Guide

223  
Organizations  
351  
Participants

October 2020

Workgroup launches

Open call for participation

Priority work items discussed  
for scoping on Draft  
Implementation Guide

Input on data usability pain  
points received, categorized,  
and prioritized

March 2021

Workgroup votes on  
priority work items

April 2021

Begin writing Draft  
Implementation Guide

June 2021

Clinician Workshop gathers  
feedback from additional vendors  
and workgroup members

August 30, 2022

Draft Implementation  
Guide published

August 30, 2022

45-Day public comment  
period begins

Sequoia Project works with  
industry partners and leaders to  
encourage and solicit feedback

October 14, 2022

Public comments due

December 14, 2022

The Sequoia Project Annual  
Member Meeting

Implementation Guide published

Continues through January 2023

Industry vendor call to action  
for commitment to implement  
guidance

Iterate for future versions of Implementation Guide

Weekly Meetings

January 2022

Monthly Meetings

# Implementation Guide

## Table of Contents

- Executive Summary & Phases Timeline
  - Phase 1 - Administration & Prioritization
  - Phase 2 - IG Development
  - Phase 3 - IG Public Comment
  - Phase 4 - IG Publication
- Statement of Intent
- Sections/Chapters
  - Six Topic Categories
  - Guidance with SHALL, SHOULD, MAY
- References
- Appendix A – High Priority Lab Results

Guidance for  
Data Provenance  
& Traceability  
of Change

Guidance for  
Data Integrity,  
Format  
and Trust

Guidance for  
Effective  
Use of Codes

Guidance for  
Data Tagging /  
Searchability

Guidance for  
Reducing  
the Impact of  
Duplicates

Guidance for  
Effective Use  
of Narrative  
for Usability

## Use Cases

- Provider-to-provider health information exchange
- Provider-to-public health agency information exchange
- Healthcare entity-to-consumer information exchange

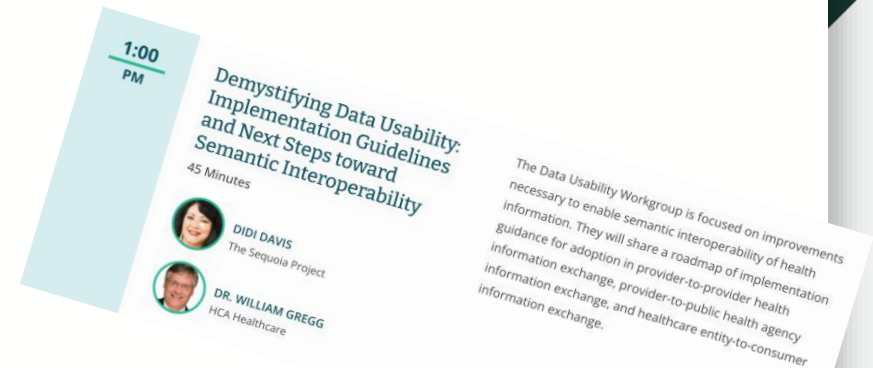

## Section / Chapter Structure

- Problem statement
- Use Cases
- Existing Published Work
- Guidance
- Future Efforts

## Phase 4: Finalizing Implementation Guide for Publication

- Comments will be disposed as they are received by the Leadership team and a summary will be socialized on the monthly workgroup meetings (first Thursday of each month) through December 1, 2022
- **The Final Version 1** of the Implementation Guide will be published **December 14, 2022**
- The Implementation Guide will be highlighted at the in-person Sequoia Annual Member Meeting in Washington, DC
  - Grand Hyatt Washington
  - Register and Subscribe for Updates
  - <https://sequoiaproject.org/2022-annual-meeting/>

## Summary of Public Comment Received – 126 Comments from 16 Organizations

- Data Provenance & Traceability of Changes
  - 9 Commenters / 21 Comments
- Effective Use of Codes
  - 9 Commenters / 32 Comments
- Reducing the Impact of Duplicates
  - 8 Commenters / 17 Comments
- Data Integrity, Format and Trust
  - 10 Commenters / 17 Comments
- Data Tagging / Searchability
  - 10 Commenters / 16 Comments
- Effective Use of Narrative for Usability
  - 6 Commenters / 7 Comments
- Additional Feedback
  - 10 Commenters / 16 Comments

## Public Comment Summary

- Problem Statement and Use Case word edits and hyperlink updates
- Public Health: Consider guidance for more than C-CDA formatted data to support immunization, FHIR, electronic lab reporting, electronic case reporting, etc.
- Consider expanding use case for Public Health to Consumer exchange for future IG versions
  - FHIR-enabled technology to provide immunization data to consumers' cell phones. Exchanging data with PHRs
- Addition of coverage for Medications
- 1.4.4 adjusted to MAY until author person is well defined
- Consider going beyond USCDI v1/v2 – decision align with regulation

## Public Comment Summary

- Update Problem Statement language
- General word edits for clarification
- Section 2.2.1.1-2 Updated uses to be more specific
- Section 2.2.2 Consider transmission of results from a Laboratory to a Public Health Agency – out of scope for this implementation guide, but will consider for future guides
- Add URL link to USCDI v2 under existing work
- Future Efforts Updates:
  - Moved 2.4.5.4 to 2.5.2.2 Future Efforts instead of the Guidance section
  - Added 2.5.4 Guidance will go beyond content exchanged for HL7 C-CDA to include HL7 v2.x and HL7 FHIR.
  - Added 2.5.6 Detailed Lab Result fields (e.g., reference ranges, Priority, etc.) will be addressed in a future implementation guide.
  - Added 2.5.7 Investigate the consumption and display of translational fields across vendors
  - Added Section 2.5.8 Consider guidance on chart correction workflows and how to propagate data edited during chart corrections downstream.

# Public Comment Summary

- Updated language for Problem Statement and Use Cases
- 3.2.1.1 Example made more specific
- 3.4.2 Further clarification on exchange of multiple IDs on data elements. If multiple IDs are linked to a single data element, there should be guidance as to what the meaning of each ID is, and which needs to be consistent. Additionally, the guide should refer to the identifier specifically (i.e. "referenceld").
  - Updated 3.4.2.3 language: Organizations SHALL record and share the consistent IDs for entries across documents that refer to the same piece of clinical data. This consistency in identifiers will enable the receiving system to safely de-duplicate repeat clinical data – and perform as a ‘resilient receiver’ as described by the [JDCWG C-CDA Whitepaper](#).
- Made changes for clarity to the following sections
  - Section 3.4.4
  - Section 3.4.4.2
  - Section 3.5.2.1

## Public Comment Summary

- Comment to consider adding guidance for receiving system in 4.4.2.1. Receiving side usability will be addressed at a later version potentially. This IG v1 focused on the senders.
- Added link to AHIMA naming policy to existing work:  
<https://ahima.org/media/mezosx50/2022-naming-policy-v3-1-21-22.pdf>
- Updated language for 4.2.1.1
- Concerns with guidance and limitation in 4.4.1 Project US@
  - Section 4.4.1.2 – concerns with legacy and consider adding address transform engines references (i.e. <https://www.smarty.com/>)
  - Refinements made to scope for section 4.4.2.2

## Public Comment Summary

- Reworded problem statement and use cases slightly
- Value of hierarchy of notes – several examples from comments and workgroup members were incorporated. Work will continue in future efforts
- Future Efforts:
  - Minor wording edits
  - Added 5.5.4. Industry and government has an interest in an interchange system that will allow advanced algorithms to parse, search and distribute data sets and digital documents based on pre-ordained data rules. Liaison and work with groups such as the HL7 Structured Documents Work Group can create business cases for further experimentation with tagging in support of advance governance technologies.
  - Current focus on EHRs and Note, but future efforts with other groups could include DICOM image exchange

## Public Comment Summary

- Made edits to Problem statement and use cases language for clarity
- Made edits to establish Discharge Summary as the floor
- Removed 6.4.5 Narrative Parsing guidance to avoid confusion

## Public Comment Summary

- Slight Language updates were made to the Executive Summary and Statement of Intent
- Appendix A – comments received to add more specifics, leadership decided to leave appendix as is and edit introductory text slightly
  - Goal to encourage (SHALL) for LOINC mapping for codes to enable testing to move the industry forward
  - Acknowledge mapping is difficult – and governance or policy will enforce what is “good” looks like
- Added reference to 2022 ISA in Existing Reference Section  
<https://www.healthit.gov/isa/sites/isa/files/inline-files/2022-ISA-Reference-Edition.pdf>
