

Annual Meeting

2023

SAN DIEGO

California

Not Another FHIR Pun

Bill Mehegan

Not Another FHIR Pun

- Review of Carequality & TEFCA FHIR efforts
- FHIR Panel

How we got here

- Synergies developed towards the end of 2022 as Carequality and TEFCA aligned with respect to FHIR
 - Carequality worked towards publishing V2 of its FHIR Based Exchange Implementation Guide
 - TEFCA published a draft of the Facilitated FHIR Implementation Guide
- In 2023 we hosted 3 FHIR Connectathons whereby we tested out Client Dynamic Registration and other critical aspects of the respective Implementation Guides. QHINs and Implementers participated in these events
- We took lessons learned from the Connectathons and made some minor updates to each Implementation Guide

We are we now and where we're headed

- Carequality is working on final edits to V2 of its FHIR IG and this should be published by EOY
- Updates to FHIR on the TEFCA side will be rolled into QHIN Technical Framework (QTF) V2 in early 2024
- Top recap: in 2024, we'll be ready for Implementers and/or QHINs to begin their FHIR Based Exchange rollouts at scale
