Overview of Future Efforts for Version 2.0 of the Implementation Guide

2023-2024 Sequoia Data Usability WG – Proposed Work V2.0

2023-2024 Sequoia DUWG - Proposed Work Items

- Google Spreadsheet used for tracking
 - Anyone with the link can comment within the document
 - Contains Phase 2 IG Development Parking lot of existing pain points
- Add FHIR guidance in addition to C-CDA technology agnostic
 - Need to flesh out use cases
- Laboratory Data Exchange
- Receiving System Guidance
- Alignment with USCDI v3

Laboratory Tiger Team – November 9, 2023

- Open call for Participation to workgroup members who are Laboratory subject matter experts and consumers of lab data
 - Quest Diagnostics resource committed
 - Outreach to Labcorp in process
- Expectation is that Tiger Team will meet monthly
 - Next meeting January 11, 2024
- Purpose of the Tiger Team work on Lab focused pain points to advance sending and receiving system guidance to improve usability for all stakeholders

Tiger Team Roster 42 members 36 organizations

Meeting Logistics and Timeline

- 2023 2024 Planned Schedule Kickoff Call: February 2, 2023
 - Ongoing calls: 1ST Thursday each month
 - Next Phase of Activities Process & Timeframe
 - Phase 1 Administration and Prioritization
 - February 2023 June 2023
 - Phase 2: Developing Initial Draft Guidance
 - July 2023 July 2024
 - Phase 3: Public Comment Period/Recommended Next Steps
 - July 2024 August 2024
 - Phase 4: Finalizing Implementation Guide and Call to Action
 - August 2024 December 2024

Community of Practice **Update**

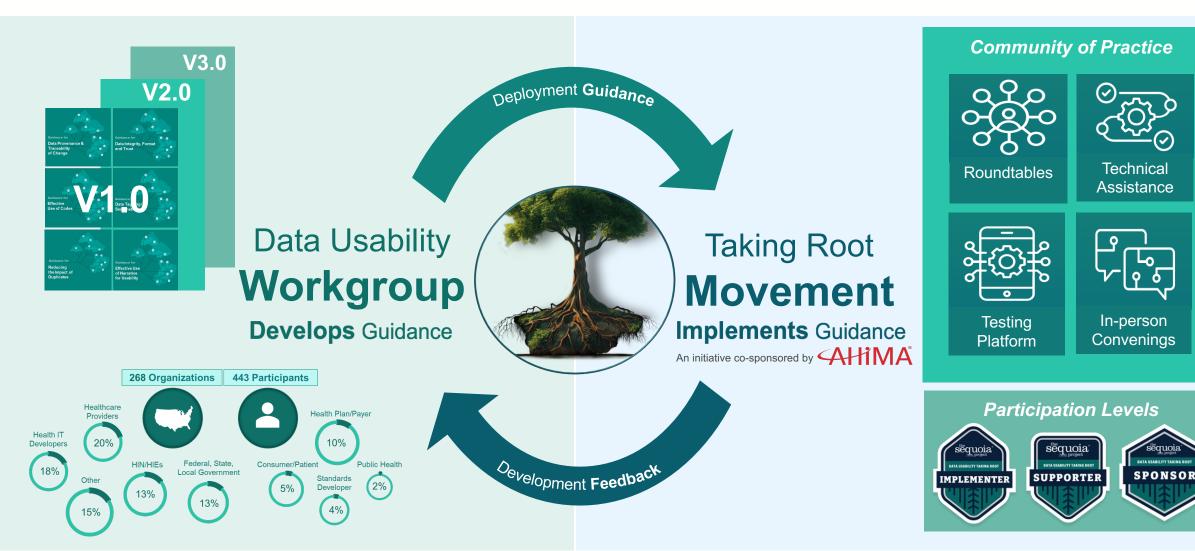

November 29, 2023

What is the difference between the **Data Usability Taking** Root Movement and the **Data Usability Workgroup**?

Data Usability Taking Root

Supporter

Pledges to support the data usability movement as a member of the data usability community of practice. Grants right to Sequoia to include logo in its Taking Root member directory. Participates in Data Usability Roundtables. Supporters that are also Sequoia members are invited to Taking Root Summits.

Implementer

Pledges to implement V1.0 data usability guidance across one or more topics within a defined timeline. Invited to participate in the data usability community of practice, the Data Usability Taking Root Planning Committee, and the Taking Root Summits. Grants right to Sequoia to include logo in its Taking Root member directory.

Levels of Engagement

Sponsor

Pledges to provide sponsorship of the Taking Root Summit(s). Socializes and evangelizes the purpose and power of this work. Co-hosts Taking Root Summits and participates in The Data Usability Taking Root Planning Committee, Roundtables, and Summits.

Data Tagging/Searchability

Data Tagging / Searchability

- <u>Data in Context</u> e.g., BP Physical location, patient positioning, method, performer, author, etc. geared to FHIR exchange
- Guidance for longitudinal view For a resilient receiver, providing robust search and filtering capabilities helps the end user to quickly find relevant
- Receiving system filtering and search within Received Documents
- Industry and government has an interest in an interchange system that will allow advanced algorithms to parse, search and distribute data sets and digital documents
- Consideration for Orders and results for diagnostic Imaging

Data Tagging/Searchability - FHIR specific proposal from Veterans Health Information Exchange (VHIE)

Scenario

 In order to close the loop on referral orders sent to external organizations, the inclusion of the original order unique ID can Close the Loop if included in the both the original order and the response message / encounter that includes the result/report.

Effective Use of Narrative for Usability

Effective Use of Narrative for Usability

• Continue to help define and encourage the use of standard narrative inclusions in various exchange use cases. Currently, there is little standardization in what is actually shared and further developing rational guidance may help consistency in the industry

Effective Use of Narrative for Usability – FHIR specific proposal from Veterans Health Information Exchange (VHIE)

Scenario

 All text messages exchanged in different FHIR resources need to be organized in a way that supports connecting specific data elements within specific structured parts of the message and the unstructured parts of the message (e.g., Clinical Note). The Care Team EHR display of the exchanged data will be enhanced and more complete because often the structured and unstructured are populated differently.
