

Interoperability MATTERS

an initiative of The Sequoia Project

Data Usability Workgroup

February 1, 2024

Agenda

- Welcome, Introductions, Membership, Agenda - Adam Davis, MD – 5 minutes
- Overview of Future Efforts for Version 2.0 of the Implementation Guide – Bill Gregg, MD – 5 min
- Data Usability Taking Root Community of Practice Update – Didi Davis – 5 minutes
- Data Provenance & Traceability of Changes work items – 30 minutes
- Save the Dates: HIMSS 2024 – 5 minutes
- Workgroup Discussion & Q&A – Didi Davis, Co-chairs and Workgroup

1												
2												
3	Data Provenance & Traceability of Changes	Guidance for Data Provenance		X	X	X	X	X		From this brainstorming page		<p>@Steven Lane comment to scorecard for v1.0: Suggest that we consider in V2 a second tier of medium priority data classes for which to collect provenance, specifically Laboratory, Clinical Tests, Clinical Notes, and Vital Signs. Also, suggest that, in V2, we specify that the Author Person SHOULD be included when it is the individual/patient.</p> <p>@Katherine Lusk comment to scorecard for v1.0: Corrections to provenance should be available in audit trail for 5 years at a minimum. Disaster preparedness with back-up plan in 2 formats with provenance. Also under Public Health comments: Exploration of the future of involvement of public health with TECCA evolution and moving organizations from direct HL7 connections, connecting thru QHINS (eCR becoming part of a QHIN) Corrections to provenance should be available in audit trail for 5 years at a minimum. Disaster preparedness with back-up plan in 2 formats with provenance included.</p> <p>@Lisa Nelson submitted comment to scorecard for v1.0: Suggest adding Healthcare Entity to Consumer Use case. DUWG can consider this if a more detailed sub-use case is developed for inclusion. Also, for the Consumer to Provider use case to support sharing of a patient's care experience preferences, treatment intervention preferences, and patient goals, author's need to support an author person (the patient his or her self). There will not be an author organization in this use case. It also may be important to clarify the importance of the "performer" role for data provenance, not just author. author person and performer are both essential in the Consumer to Provider use case.</p>

ALL Comments Incorporated into Working Draft IG V2.0

1. Data Provenance & Traceability of Changes

Problem statement

There are many things that can happen between a clinician documenting a piece of clinical data in one system, and a downstream user seeing that data in their own system. "Provenance" refers to the origination or modification (update) of a piece of data and what has happened to it as it has been transmitted between systems, which may include the name of the clinician who originated a piece of data, their organization, or modifications that have been made to the data. Provenance can convey metadata that typically comprises the who, what, when, where and why of the origination or update event. Provenance may pertain to a composite dataset (e.g., CDA/C-CDA document or section) and/or to individual data elements (attributes). Provenance may be inextricably bound to data content (e.g., with digital signature), or may be asserted by association with particular documents, datasets or data elements. Data usability can be impacted when data content/context is ambiguous. The Data Usability Workgroup notes that while the issue is complex, incremental changes to improve provenance can be expanded with future versions.

The problem today is multi-dimensional:

1. The data provenance detail is often not shown to users in receiving systems.
2. Data provenance elements are not always populated in sending systems.
NOTE that USCDI v1/v2 only include two provenance elements: author's organization and timestamp.
3. Data exchange leveraging C-CDA in production today does not yet typically include provenance attributes.
4. Intermediary data transformations may occur as a result of translational processes, (e.g., a medication intolerance could mutate into an allergy), provenance may help in tracking through intermediary systems.
5. Provenance metadata alone does not *ensure reliability of information*, but is one important dimension in the trust framework. e.g., changes to data from the original entry may also be corrections or meaningful updates to inaccurate historical information.

Use Cases

 **Laura Bright**
7:11 PM Jan 20

Comment received from Steve Eichner from v1.0 public comment: Added as future work and consideration should be added for v2.0 work as follows: Page 8: Line 20 The document considers the exchange of C-CDA formatted messages, but does not consider other relevant exchanges. A variety of messages, including HL7 immunization information system Implementation Guide v 1.5, Electronic Laboratory Reporting, and electronic Case Reporting, support different aspects of provenance information.

[Show less](#)

 **Laura Bright**
4:18 PM Today

Question 3) Are there elements in the guidance in v1 that we want to strengthen? (ie. make MAY into SHOULD or SHALL)

 **Laura Bright**
2:05 PM Yesterday

Question 1) What data elements are priority to add, now that PAMI is covered?

 **Laura Bright**
4:18 PM Today

Question2) Are there Use Cases we need to add? Additional Public Health Use Cases, Remote Patient Monitoring, Reconciliation, Patient Access, and Patient's correcting their data were suggestions in the comments on v1 of this document. Others?

 **Laura Bright**
7:13 PM Jan 20

Comment from William Gregg: I added a public health scenario -- not sure if this hits the mark, but is something I have seen cause confusion. Welcome other input on use cases for Public health provenance

- Prior Provenance “parking lot” documents updated to view only access
- Comments incorporated into this [working draft](#)
- Comments will be discussed and on monthly calls
- Homework assignments for input from Workgroup monthly
- Internal comments resolved leading to public comment version posted July 2024

Meeting Logistics and Timeline

- 2023 – 2024 Planned Schedule
 - Kickoff Call: February 2, 2023
 - Ongoing calls: 1ST Thursday each month
- Next Phase of Activities - Process & Timeframe
 - Phase 1 - Administration and Prioritization
 - February 2023 – June 2023
 - Phase 2: Developing Initial Draft Guidance
 - July 2023 – July 2024
 - Phase 3: Public Comment Period/Recommended Next Steps
 - July 2024 – August 2024
 - Phase 4: Finalizing Implementation Guide and Call to Action
 - August 2024 – December 2024

Status

- Ready for use
- Will be distributed to implementers upon signing pledge in March
- Quarterly reporting process
- Anonymized and aggregated reporting

Congratulations on committing to improve the usability of health data!

Your willingness to implement the DUIGV1.0 will set an example for others to follow. We appreciate and support your leadership and innovation.

Data Usability Implementation Guide Version 1.0 : Taking Root Implementation Scorecard

FAQs

How do I complete the Scorecard?	This worksheet contains tabs representing the 6 areas of the IGV1.0 available for implementation. Open up the tabs for the areas you've pledged to implement in your organization and fill in the required information. Save the worksheet using the following file naming convention: TAKING-ROOT-SCORECARD_yourorgname_date
Who do I contact with questions?	ddavis@sequoiaproject.org
How do I submit the completed scorecard?	via email to ddavis@sequoiaproject.org
When do I submit the completed scorecard?	Scorecards are due on a quarterly basis: July 31st, Oct 31st, Jan 31st, and April 30th
How will the information be used?	Scorecard data will be anonymized and aggregated. Only aggregated data will be shared with the Taking Root Community of Practice Roundtable.
Where can I find the IG V1.0?	https://sequoiaproject.org/wp-content/uploads/2023/08/2022-12-14-Sequoia-DUWG-IG-Version-1-1.pdf
