Jenna Rychert, ARUP sent a chat · 4:23 PM
ah...thank you, I was hoping so

Steven Lane sent a chat · 4:25 PM

Andrea Pitkus, PhD, MLS(ASCP)CM, FAMIA sent a chat · 4:25 PM
can you gather data on v3, v4, and draft v5 elements?

Steven Lane sent a chat · 4:26 PM
Laboratory data elements in USCDI v4: https://www.healthit.gov/isa/uscdi-data-class/laboratory#uscdi-v4

Andrea Pitkus, PhD, MLS(ASCP)CM, FAMIA sent a chat · 4:29 PM
It is true measuring presence of a LOINC vs accuracy of LOINC mapping are 2 different things

Jenna Rychert, ARUP sent a chat · 4:30 PM
There may also be differences in the level of operability by specialty...we may do a great job with analytes that are public health reportable, but not at non-PHR. We may be good at chemistry tests, but terrible on genomics.

Andrea Pitkus, PhD, MLS(ASCP)CM, FAMIA sent a chat · 4:30 PM
It would be interesting to across laboratory areas

Andrea Pitkus, PhD, MLS(ASCP)CM, FAMIA sent a chat · 4:30 PM

Orders, as included in Draft USCDI v5: https://www.healthit.gov/isa/uscdi-data-class/orders

Andrea Pitkus, PhD, MLS(ASCP)CM, FAMIA sent a chat · 4:38 PM
Condition Acceptability may include Hemolysis, Lipemia, etc

Jenna Rychert, ARUP sent a chat · 4:45 PM
I would be happy to draft the use case for a reference lab

Natalee Agassi sent a chat · 4:48 PM

https://ivdconnectivity.org/livd-specification/

Andrea Pitkus, PhD, MLS(ASCP)CM, FAMIA sent a chat · 4:49 PM
LIVD is the specification for IVD vendors to share their LOINCs in a standardized way

Kristin Benware sent a chat · 4:51 PM
Should we be asking for the sender to submit for the result whether it is reportable or not ... speaking from infection control/public health perspective?

Jenna Rychert, ARUP sent a chat · 4:53 PM
Is there a link to this google doc? or is this in the Excel sheet?

Bill Gregg sent a chat · 4:54 PM
This is the link to the spreadsheet
https://docs.google.com/document/d/12_5OAgYSvWZfqn69Bhyo_SiZUKpp6SGqbq9ACdXPFnM/edit

Natalee Agassi sent a chat · 4:55 PM
methodology LOINC codes

Steven Lane sent a chat · 4:59 PM
I question the utility of including the reportability of a given result as an interoperability element, as this is largely managed in the eCR standards.
